

DESHABANDHU MAHAVIDYALAYA

Name of the event: Annual College Fest 2025

Date: 18/12/2025- 19/12/2025

Venue: College Campus

Organizer: Deshabandhu Mahavidyalaya

Report:

The annual College Fest was held on 18th and 19th December, offering an energetic and engaging platform for students to express their creativity and apply academic learning in practical ways. Students from the Department of Geography actively participated in the Departmental Projects Exhibition, which was one of the key highlights of the event.

In the week leading up to the fest, students worked sincerely under the guidance of their faculty members to prepare models and thematic displays with a special focus on non-conventional energy resources. The exhibits emphasized the significance of renewable energy in achieving sustainable development and environmental balance. The projects included illustrative models and presentations on solar power, wind energy, biogas, and other alternative energy sources, highlighting their working mechanisms, spatial distribution, and relevance in the present-day energy scenario.

During the exhibition, students confidently explained the geographical concepts associated with each model, effectively linking physical geography, resource utilization, and sustainable planning. Their presentations reflected a clear understanding of the role of renewable energy in reducing environmental degradation and addressing future energy needs.

Although the department did not receive any award, the experience was academically enriching and rewarding. Participation in the fest enhanced students' practical understanding, communication skills, and teamwork. Overall, the event strengthened experiential learning and reaffirmed the Department of Geography's commitment to promoting sustainability, environmental awareness, and applied geographical knowledge.
