1. Timing of the classes.

It helped me not only to pursue good marks but also our teachers', faculty members were always cooperative and friendly and that made me build up a good personality which will be helpful throughout my whole life ❤️.

Change the faculty of computer science. I have wasted 2 years (4 sem). I did not learn anything from my department faculty. I had an expectation. Now I have 2 sem on this college. Dear principal sir, I am requesting you please help me to learn something from my department faculty. As I told you, I have learned many computer science concepts from my own in YouTube. Thank you.

- 1- Teachers should explain the concept to every child and make sure that everyone can understand them.
- 2- Teachers should give proper notes about the topics to their students.
- 3- Teachers should check and encourage every student to work hard in their studies.

Everything was perfect

I want to suggest my institution for facility of class banch.

It is overall very good

1) Development of the education system. 2) proper time to learn. 3) progress

1. Syllabus portions should be done chapterwise.
2. Visual presentations can be a large part of understanding for students if it managed well.
3. 2 week based tests of the tough portions of the syllabus can prepare students better for their assignments as well as for their exams.

The institution is good, but if it makes very good so, teachers will have to do a depiction about all students who has not been the strength to say anything in front of teachers that they are facing inability, those pupils to make them learn to fight those of challenges like speech and I think it would be Necessary. In last but not the least that all the teachers gave me love, and courage so that I had judge myself and as well as identity, thanks to hearing and bearing me. .

Offer training opportunities.
extra curricular activities
Try to reach every student and ask for their doubts

The teachers supported me a lot not only in my studies but also in life,they teached me the lot of things,that I think will be very helpful in my future life and i am very grateful to them .

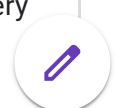

Teachers do make efforts to teach us accurately , but time was too much short for us to cope up with the difficult topics of the subjects , revisions and too much teachings on those difficult topics should be carefully undertaken for the easy understanding of those subjects ..

According to me it should be improved from 90% to 100% ..

- Need more study materials for English version students for every stream.
- include more degital learning process so students show more interest and be attentive.
- include class test which enhances the teaching - learning process.
